

Tiago da Silva

tdsh97@gmail.com | github.com/tiagodsilva | tiagodsilva.github.io | linkedin.com/in/tiagodasilvah

Education

- PhD in Applied Mathematics**2024
- School of Applied Mathematics, Getulio Vargas Foundation, Brazil. Advisor: [Prof. Diego Mesquita](#). Graduated in one year.
- BSc in Data Science**2020 – 2023
- School of Applied Mathematics, Getulio Vargas Foundation, Brazil. GPA: 9.9/10.0.

Employment

- Mohamed bin Zayed University of Artificial Intelligence**Abu Dhabi, UAE
- Postdoctoral Associate under supervision of [Salem Lahlou](#).
 - Designing algorithms for amortized Bayesian inference.2025/10 – ongoing
- Rei do Pitaco** (fastest-growing sports betting startup in Brazil)Santa Catarina, Brazil
- Data Scientist & Engineer.2025/01 – 2025/11
 - I spearheaded the development of a bet builder, allowing customers to create customized bets (approximately 50% of the company’s revenue, up to 1.2 million requests per day). I also built near-real-time dbt and Airflow pipelines.
- Aalto University**Espoo, Finland
- Visiting scholar under the supervision of [Samuel Kaski](#) and [Vikas Garg](#).2024/07 – 2024/10
- Proffer** (Price Monitoring & Optimization startup)Rio de Janeiro, Brazil
- Software Engineer.2024/04 – 2025/09
 - I led the adoption of Infrastructure as Code (IaC) with Terraform as a standard for the company’s web scraping services.
- Rei do Pitaco** (largest fantasy sports company in Brazil)Rio de Janeiro, Brazil
- Data Science intern.2023/01 – 2023/07
 - I designed predictive models to define the opening lines of bets on the outcomes of sport events (bookmaking).

Selected Honors & Awards

- Top-ranked PhD thesis** as per [CAPES](#) (Math & Statistics) and [SBC](#) (for CS in general and AI in particular).2025-2026
- Award for Academic Excellence**, [FGV EMAp](#) and [SBMAC](#).2023
- Highest score in the country**, Brazilian Mathematical Olympiad of Public Schools.2018-2019

Selected Publications ([Google Scholar](#))

- 1. Path-dependent Discrete Amortized Inference**ICML 2026 (oral)
- [da Silva, T.](#), Whitammer, E., Lahlou, S.
- 2. When do GFlowNets learn the right distribution?**ICLR 2025 (spotlight)
- [da Silva, T.](#), Silva, E., Alves, R., Souza, A., Garg, V., Kaski, S., Mesquita, D.
- 3. Generalization and Distributed Learning of GFlowNets**ICLR 2025
- [da Silva, T.](#), Souza, A., Rivasplata, O., Garg, V., Kaski, S., Mesquita D.
- 4. Embarrassingly Parallel GFlowNets**ICML 2024
- [da Silva, T.](#), Souza, A., Carvalho, L., Kaski, S., and Mesquita, D.

Skills

Human languages: Portuguese (Native), English

Computer languages: Proficient with [Python](#) and [SQL](#). Competent with R and Stan and Rust.

Scientific computing frameworks: PyTorch, PyTorch Geometric, GPyTorch, NumPy, SciPy, Jax, sklearn, Pandas.

Technologies: Git, Linux, Docker, FastAPI, Datadog, Kubernetes, Argo, Tailscale, Kafka, Airflow, dbt.
